

EJ120 Air Purifier

- Meet EJ, the Tesla of air purifiers - made in USA with a super efficient & quiet German motor and top notch performance. Energy Star.
- CNN Best Air Purifier for Large Homes 2019. Women's Health Editor's Choice 2019
- Removes Allergies, Asthma, Dust, Bacteria, Pollen, Mold Spores, Pet Dander, Smoke
- Medical Grade HEPA filter (MERV17) tested to remove 99.99% of airborne allergens & particulates. Ideal for tobacco smoke removal
- See how it compares to air purifiers that "destroy" pollutants
- What's included: Air purifier with filters installed, User's Manual
- If you are in a high dust environment we suggest adding the pre-filter in front of the carbon filter

EJ120 Air Purifier

Meet the EJ120 Air Purifier

EJ is the newer, smaller version of the ERIK650A. EJ stands for Erik Junior. While it is smaller, the EJ120 has a strong CADR of 360 for pollen and is our quietest high performance air purifier. And it does this with only drawing 52 watts of power.

We searched the world to build the ultimate air purifiers. In Germany we found the largest factory of high performance motors, just like a Tesla engine. So, you get high performance and reliability with low energy usage.

The image shows a white and grey EJ120 air purifier from a three-quarter perspective. It has a large, black, perforated front grille and a smaller one on the side. The top is a dark grey color.

-  **Industry-Standard**
Proprietary carbon for advanced gas control
-  **Filter**
Effective for allergies, dust, smoke and gases (methane gas, sulfur gases, and many others.)
-  **Reliability and Quality**
Air purifier, filters, housing and electronics all made in USA.
-  **Easy to use**
Simple controls with electronic 5 speed button to dial in the exact air flow.
-  **Efficient**
Latest German engineered motor is quieter and uses up to 90% less energy
